- › Microsoft PowerBI
- › Docker & K8s

## INDUSTRY EXPERIENCE

### Intermediate Software Developer Bold Commerce

February 2021 - Present

50 Fultz Blvd, Winnipeg MB

#### Development

- › Maintained legacy subscription PHP application embedded in Shopify utilized by merchants worldwide
- › Development included customer-facing front-end checkout, merchant-facing front-end administration pages, core PHP application back-end code, and PHP API endpoints
- › Maintained application with continuously changing Shopify requirements for API versions and dependencies
- › Lead developer overseeing MySQL & PHP migration upgrades to application

#### Dev-Ops & More

- › Maintain communication between Bold teams utilizing common code dependencies and organize common deployments for upgrades
- › Oversaw sprint planning and task delegation for a small team of developers and contractors (Agile, Kanban).

### Applications Developer Geomax Mobile Corp.

May 2014 - February 2021

1040-201 Portage Ave, Winnipeg MB

- › Lead developer on numerous transportation related web+mobile applications utilized by nation-wide partner companies: Trailer manifesting, Driver dispatching, Maintenance tracking, and GPS tracking.
- › Designed and developed an Android based driver log application and NodeJS back-end API to meet Canadian legal requirements.
- › Assisted with the co-op interview process and mentored all co-op students during their term.
- › Transitioned source control from SVN → GIT and build system from Hudson → Jenkins.

### Software Development Engineer Amazon.com, Inc. (Co-op)

May 2015 - August 2015

1800 9th Ave, Seattle WA

- › Developed "Decision Service" to consolidate historical client chargeback details.
- › Modified chargeback workflow to forward chargebacks to the Fraud Team based on results from the decision service. Estimated to allow recovery of thousands of dollars per month.
